Clemo

Official Whitepaper

ABSTRACT

CLEMO is a tech venture, identifies and replicates successful pure-play business models for the global markets.
CLEMO works to build, launch, and scale high growth ventures.

Its focus is to unlock the true market potential of the digital economy for high
consumer demand services such as e-commerce, e-media (includes
esports/gaming),
eligible to apply for government tenders and contracts and provide blockchain

CLEMO deploys a DBOT (Design, Build, Operate, and Transfer) model using emerging technologies with a particular focus on esports, Blockchain, AI, AR/VR and Cloud Computing.

Using a proprietary 9-point funnel system developed in-house, we process business
ideas and concepts in a structured way that focuses heavily on data and removes any individual bias.
In order to be competitive in our selected verticals, we require largely language
agnostic, interoperable solutions that can scale rapidly without issues of congestion or security.
CLEMO headquarters will build in the British Virgin Islands, and will have multiple companies in Singapore and UAE to ensure a presence in the region's business capital.

What is CLEMO?

Ten features on the Binance Smart Chain and Polkadot were owned by the first truly decentralised community, which will soon also control our Clemo Blockchain.

The market for cryptocurrencies is overrun with coins, each of which offers a unique function. The digital company Clemo, however, was built on the idea of doing away with the difficulty of managing all these tokens in a single wallet. The project intends to uncover and replicate effective business concepts in order to develop and launch high-profit companies.

In order to provide high consumer services like e-commerce, esports, gaming, the simplicity of applying for government contracts, and providing a blockchain, the company seeks to uncover the true market potential of the digital economy. The company has also unveiled a special token with traits of all the most popular crypto tokens on the market that is intended for high.

What is clemo

Our mission and visions

Every user has access to something useful. You will undoubtedly compile the most well-liked elements under one roof, increasing interest in
our project because

After researching the market, we discovered that there are many different types of cryptocurrency investors. Some are particularly interested in gaming, while others only want to invest in high-yield and auto-staking projects,
and others enjoy NFTS.

After careful consideration and preparation over the course of seven months, we chose to merge all those qualities under one roof.

After researching the market, we discovered that there are many different types of cryptocurrency investors. Some are particularly interested in gaming, while others only want to invest in high-yield and auto- staking projects, and others enjoy NFTS.

To launch our token on several exchanges and use an excellent marketing strategy to reach the majority of people interested in cryptocurrency.

COMPATIBILITY WITH CROSS CHAIN

Launching on Binance Smart Chain, the third-largest cryptocurrency, CLEMO the second-largest blockchain in the world by market capitalization global value locked on chain by total. Our projects' smart contracts are written in Solidity and are compatible with all EVMs blockchain. This makes our objective of switching to another EVM feasible. blockchains like Moonbeam (a layer 2 Ethereum blockchain) and Polygon (parachain on Polkadot) a painless.

Our chain-wide integrations won't until we are working on our entire set of features and DAO. Smart Chain for Binance. Following is a partial list of the blockchains that CLEMO will be integrated with. The subject of cross-chain governance has not been properly investigated or implemented, therefore it might

TARGET MARKET

With so many components in this system, we want to appeal to a sizable consumer base made up of many different demographics. These markets are breakable divided into four primary groups: token holders, creators, investors, and consumers. Below is a detailed explanation of this wide picture.

Cross Chain

Target Market

- ## Creators

  This category includes, but is not limited to, musicians, artists, and content producers. The financial systems, title businesses, politicians, athletes, and inventors within this group.

- ## Investors

  once more, including but not limited to: asset managers, NFT traders, and art collectors Consumers, businesses, cryptocurrency investors, investment companies, and banks systems. Buying from creators or buying and selling on our platform transactions can additional market.

- ## Token Holders

  Token holders make up our third category. This person decides to give financial assistance to the exchange system because they recognize the advantages of doing so. decisions regarding significant market developments and This person decides to give financial assistance to the exchange system because they recognize the advantages of doing so. decisions regarding significant market.

- ## Everyday Consumer

  Who have money in their pockets but no tangible assets maintaining the same level (or higher) of transaction quality will inevitably lead to our platform.

  In conclusion, Clemo's organizational design attempts to reach out to each a portion of the current bitcoin market. There is benefit available to every user of the Web 3.0 technology incorporated into this device. Transactions that are tokenized Due to the quickness of our real estate transactions, customers wishing to simply shrink.

CLEMO TOKEN

The Clemo token ($CLEMO) is a bep20 token having an 18-decimal place total supply of 10 million.

Solution

Experts in the blockchain and industry worked by hand to create Clemo's tokenomics.

Our project's core goals and the community we serve serve as the foundation for our tokenomics. The three main components that went into creating Clemo's tokenomics are token utility, price stability, and community security. There are 10,000,000 (10,000,000) Clemo Tokens in total. This figure makes our market cap easier to understand and easier to interpret.
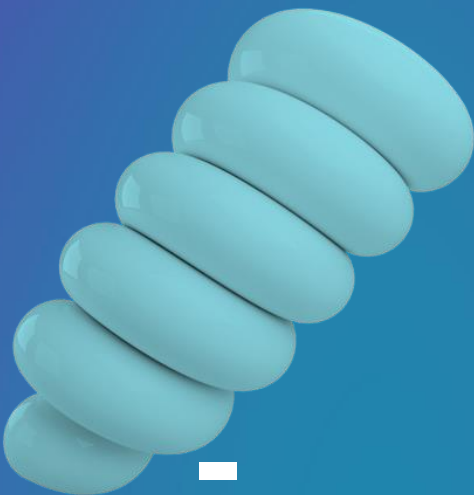

CLEMO Distribution

The Clemo token supply is distributed as follows:
- Presale: 36%
- Liquidity: 19%
- Private: 10%
- Projects ecosystem: 10%
- Exchanges: 10%

- Advisors: 10% after launch by 1 day then 10% monthly linear distribution over 9 months.
- Projects ecosystem: 10% after launch by 1 day then 5% monthly linear distribution over 18 months.

Price & vesting

WHITELIST

If you participate in private sale or have at least one nft clemo lottery ticket in your wallet, you can join the whitelist.

Because everyone who owns a private bakery or a ticket instantly joins the presale whitelist

By the way, keeping your Clemo NFT lottery tickets in your wallet has two additional advantages.

You're in the running to win a Tesla Model S, a Mercedes-Benz C-Class, or a Victory Vegas 8-Ball motorcycle.

- If you possess an NFT ticket, you will receive 2% of every buy or sell on the Clemo token and 2% of the Clemo apy token as BNBs every day.

- APY
- CASINO
- SEARCH
- BROWSER
- WALLET
- SWAP
- MARCKETPLACE
- CITY
- BLOCKCHAIN

1- CLEMO LOTTERY

Anywhere anyone can be a big winner.

We will launch our lottery with three products, increase them later, and subject everything to a public vote.

For it each of the three contracts we have calls for a total

supply of 1500 tickets. There will only be three winners of the

Tesla Model S, Mercedes Benz C Class, and
Victory Vegas 8-Ball Motorcycle.On launch day, a live lottery drawing will take place in
our group.After minting any ticket, we shall first place 1500 numbers
on a lottery wheel, with those numbers representing your ID.

Additionally, BSCscan has your ID listed.

There will be ten nominees in the first round, and then we'll
start stage two and spin the wheel with all ten nominees once
more.

And if we hold our nft ticket at just one place, we'll get a Tesla automobile.

And on the Mercedes and Vegas 8-Pall Draw Lottery, we'll
reiterate everything that just happened . What if you own a
ticket for our lottery but are not the lucky winner? Prior to our
presale, you were automatically whitelisted.

Following launch, you will start receiving BNBs from clemo token
and clemo apy token cuts of 2% from each transaction.

2-CLEMO APY

Clemo APY is the most stable automatic staking protocol in the field of DeFi today.

Clemo APY has a fixed APY of 907,032.14%. Holders receive interest in tokens EVERY MINUTE. This is an actual limit for the Binance Smart Chain network to keep the system running smoothly. Thus, an investment of $1,000 in x tokens yields $9,070,321.40 in CAPY tokens in just 12 months.

Clemo APY also includes the following:

Clemo NFT Lottery "hold a ticket and earn BNB daily +

awesome cars!" Clemo BUSD bank "receive BUSD in your

wallet daily"

STAKE AND EARN

Clemo APY provides users with a high-tech decentralized financial asset that allows users to earn rewards in the form of a sustainable fixed compound interest model through the use of a unique Auto-Staking.

Clemo APY Auto-Staking is a new financial protocol with enhanced security system that makes staking easier and more efficient, and provides $CAPY token holders with the highest stable returns in cryptocurrency.

Clemo APY provides $CAPY token with automatic staking and interest functionality, as well as the highest fixed APY at the market at 907,032.14% for the first 12 months.

Clemo APY is a company focused on DeFi innovation that creates benefits and value for $CAPY token holders. Our protocol, which is used in the $CAPY token, provides
$CAPY holders with exceptional benefits:

Low risk with Risk Insurance Fund (RIF) - 3% of buy and 3% of each sell of $CAPY tokens are redirected to RIF; this helps to ensure the payment of staking rewards.

APY

Easy and safe placement. You are the full owner of your tokens. You do not need to transfer your tokens to third part centralized platforms to receive staking rewards. It is enough to buy $CAPY tokens and keep them on your personal wallet, after which you will automatically receive rewards on your wallet as well.

Interest income with automatic payments. You do not need to do any re-staking of your tokens. Interest income is paid automatically to your wallet. This way you will never miss a subsequent payment.

Highest fixed annual interest rate - Clemo APY pays 907,032.14% for the first 12 months. This is a record APY at the DeFi market. After the first 12 months interest rate is reduced over a predetermined period of the long-term interest cycle.

Fast interest payments. Clemo APY financial system pays rewards to every $CAPY holder every minute, making it one of the fastest automated interest calculation protocols in cryptocurrency while maintaining a stable and smooth running.

Automatic burning of tokens. One of the most important features of Clemo APY financial system is an automatic token burning system, which allows you to control the circulating supply of $CAPY tokens, as well as maintain a high price of $CAPY token. Based on this system 1% of all market sales 1 $CAPY tokens are burned in the same single transaction.

Clemo APY uses a complex set of factors to support the price of its $CAPY token and the rebase reward. It includes Risk Insurance Fund (RIF), which serves as an insurance fund to achieve price stability and long-term sustainability of Clemo APY by maintaining a constant rebase rate of 0.0017338% paid to all holders of $CAPY tokens for each EPOCH (1 minute).

Clemo APY development team has combined all these factors into a single system that will work behind the scenes. As a result, we got an efficient, stable working system of rates and rewards for $CAPY holders.

Why are we better than our competitors?

The power of compound interest. It is important to note that your balance will not grow linearly, but exponentially over time. Assuming compound interest 0.0017338% / 1 minute:

EXAMPLE:

if you started with a balance of only $1,000 on the first day, after a year your balance will grow to $9,070,321.40.

APY

● **Safety Guarantee**

Ensuring the safety of holders is the main criterion of our work.

Other projects use the EOA wallet to burn tokens. No one knows if they have the key to manage this wallet or not.

They can sell a large number of tokens or take a large amount out of liquidity at any time.

To ensure safety, we in turn provide a verifiable token burn wallet address that does not have an owner.

● **Convenience**

In addition to manual repurchase (like other projects), we have automatic repurchase for each sale.

● **Sustainability**

Other projects with addition of LP have consequences in the form of a significant prices drop. This doesn't happen with us.

We take time to record an exponential decline in interest rate changes every year. As a result, we have a fixed rate for 1 year, which changes annually.

We have both feet on the ground

We have developed a special algorithm to avoid a price drop with each rebase, unlike most other projects.

3- CLEMO CASINO

The first decentralized casino betting platform in the world is Clemo Casino. Our users' unmatched wagers may be put securely on a trust-based, non-custodial wagering platform using decentralized technology, community governance, and smart contracts. This platform will transform the worldwide casino business by enabling players to invest.

We offer a comprehensive DeFi platform for this project, backed by a protocol and community-owned liquidity pools, to enable the convergence of casino gaming and prediction markets. Developers can use the suite to provide their DApps unmatched betting capabilities; the first will be the decentralised casino gaming app Clemo Casino

These dApps enable people and communities to live in safety and justice. The odds are automatically optimized and implemented to users based on the market, operating on a transparent and secure infrastructure layer, untouched by centralized entities.
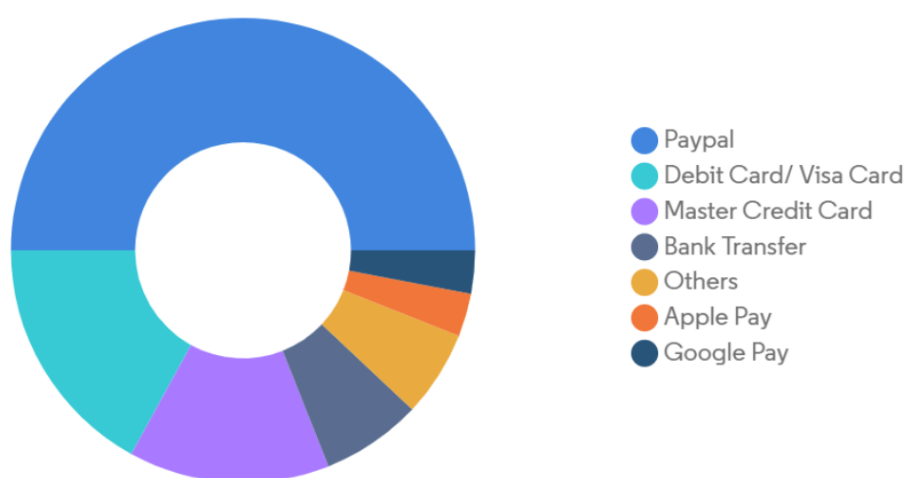

Our team's hypothesis is that the global gambling sector is impacted by the economy and the epidemic based on this project. We wish to provide users a gaming experience that is more practical. We created CLEMO casino so that users could use their smartphones wherever they were to enjoy the casino experience. At its inception, CLEMO aimed to end long-standing technological innovation at the level and bring the conventional casino sector to the decentralised field

Overview of the online gaming market

At a cumulative annual growth rate (CAGR) of 20.1%, the market for casino management systems worldwide is anticipated to increase from $5.71 billion in 2021 to $6.85 billion in 2022. At a CAGR of 16.8%, the market is anticipated to reach $12.74 billion in 2026. Throughout the forecast period, it is anticipated that the global market for online gambling will expand at a CAGR of 11.49%. (2022 - 2027). Despite the fact that the global pandemic had an impact on the market and that online platforms were increasingly used by consumers to get through financial, social, and psychological crises during lockdowns, the online CAGR was lower than that of traditional casinos.

Consumers and Online Players now have the option to make convenience payments thanks to the growing use of mobile payments and internet payment gateways
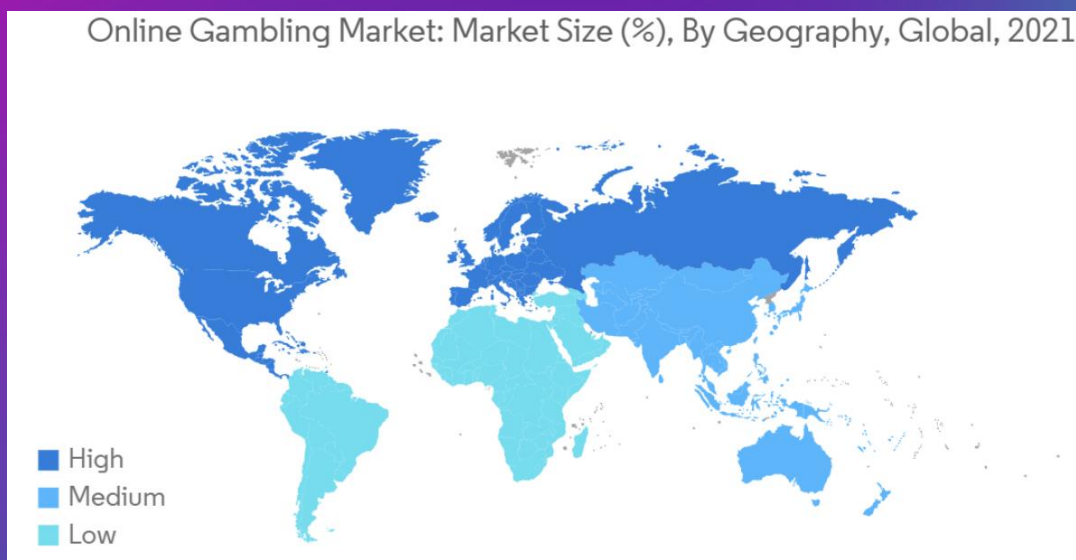

CASINO

Online Gambling Market: Most Used Payment Option for Online Gamers (%) Global, 2021

- Apple Pay
- Google Pay

The industry for internet betting is expanding as a result of the growing popularity of remote gambling. The market for online gambling is currently being driven by an increase in the number of female casino patrons, who find it more comfortable to use cashless payment methods when playing.

Online betting on casino or sports-like games is often considered to be gambling. Game type, end user, and geographic segments have been used to divide the online gambling market. Sports betting (football, horse racing, e-sports, and other sports) casino (live casino, baccarat, blackjack, poker, slots, and other casino games), lottery, and bingo are the several game types that make up the market.

North America is still the region with the fastest growth;

CASINO

The native CLEMO cryptocurrency powers the decentralised Clemo Casino technology. By wagering on the dApps platform, players can win prizes in the form of $CLEMO. While individuals earn $CLEMO by taking part in the forum's governance and security, community members earn $CLEMO by supplying liquidity. All $CLEMO token owners receive a portion of all ecosystem revenue.

With the CLEMO casino protocol, we hope to create an interoperable DeFi architecture that will revolutionise the industry of gambling by utilising decentralisation to enhance and broaden the appeal of this age-old human hobby.

4- CLEMO SEARCH

● Overview of the online gaming market

Google monitors everything you do, sells your information to marketers, and exposes you to hackers. The user comes first with Clemo. not a lot of tech

It is your data Your choice.

● Independent search

Even ostensibly "neutral" or "private" search engines depend on advanced technology for their outcomes. Clemo is unique. Based on a custom index that we created from scratch, we give results. We owe no one anything.

● Real transparency

Results are neither skewed or censored by Clemo Search using any hidden techniques or algorithms. To improve outcomes, we rely on anonymous community contributions, and to ensure variety, we use alternative ranking algorithms developed by the community.

● Comprehensive privacy

The connection between a privacy browser and private search offered by Clemo is best in class. This entails comprehensive internet security both during and after your search.

● Fully private, anonymous search

integrated with a secure browser for both mobile

and desktop Transparency in the ranking of

search results

use a separate search index

SEARCH

The most comprehensive, independent, and private search engine in the world is Clemo Search. Clemo provides the first all-in-one browser/search alternative to the major tech platforms by including Clemo Search inside its browser. Most popular browsers, including the Clemo browser, as well as ClemoSearch.com, will have Clemo Search set as their default search engine.

Clemo Search will automatically be established as the default search engine for those Clemo users who will download Clemo browser later.

The address bar of any browser tab can be used to perform searches by setting Clemo Search as the default search engine in Clemo or the majority of other popular browsers.

Visit ClemoSearch.com from any browser to access Clemo Search.

Other search engines are still accessible in the Clemo browser. To do this, either go to that search engine's website (such as google.com) or change the default search engine in the Clemo browser.

You can set Clemo Search as the default search engine in the majority of popular browsers because we do not support walled gardens. Visit ClemoSearch.com instead.

In the future, we also intend to provide Clemo Search with API access so that it can power additional search engines.

Most importantly, Clemo Search respects fundamental privacy principals. You, your searches, and your clicks are not tracked by us. Ever. Contrary to the overwhelming majority of search providers, who collect every bit of information about your search behaviour and tie it directly to you.

5- CLEMO BROWSER

BROWSER

● **The best privacy online**

3x faster than Chrome. Better protection from Google and Big Tech.

● **Stop being followed online**

By default, blocks the trackers & creepy ads on every website you visit. And that thing where ads follow you across the Web? We block that, too.

● **Online privacy made simple**

All the good of ad-blocking, incognito windows, private search, even VPN. All in a single download.

● **Switch in 60 seconds**

Quickly import bookmarks, extensions, even saved passwords. It's the best of your old browser, only safer. And it only takes a minute to switch.

● **Privacy you can see**

No creepy ads & trackers means less stuff (visible or hidden) on the sites you visit. And that means faster page load, better battery life, even mobile data savings.

BROWSER

- Online privacy by default

- Cross-site trackers blocked

- Fingerprinting blocked (cookie-less trackers)

- Protections against bounce tracking

- Advanced features

- Clemo Rewards

- Invasive ads blocked

- Cookies blocked

- Malware & phishing protection

- Anonymized network routing

- Advanced security

6- CLEMO WALLET

A secure, browser-native wallet to buy, store, send, and swap your crypto assets.

Clemo is one of the safest browsers on the market today. It blocks privacy- invasive ads & trackers. It blocks third-party data storage. It protects from browser fingerprinting. It upgrades every webpage possible to secure https connections. And it does all this by default.

It's also built off the open-source Chromium Web core, which powers browsers used by billions of people worldwide. This source code is arguably vetted by more security researchers than any other browser. In short, not only is Clemo safe to use, it's much safer than almost any other browser.

● **Does clemo have a VPN?**

Yes! Clemo Firewall + VPN protects everything you do online, on your entire device, even outside the Clemo Browser.

● **What languages is Clemo available in?**

The Clemo Browser is will available in nearly 100 languages in all, including four different dialects of Chinese. Clemo Search is currently available in English, with support for many more languages coming soon.

● **Is Clemo open source?**

Yes. The Clemo Browser is built on the open-source Chromium Web core and our own client code is released under the Mozilla Public License 2.0.

● **How does clemo compare to chrome Clemo?**

Simply put, the Clemo Browser is 3x faster than Google Chrome. By blocking all privacy-invading ads & trackers by default, there's less stuff to load on every single webpage you visit. That means pages load much faster, saving you time, money, and battery life. It also means you're much safer online.

The secure multi-chain crypto wallet. No extension required.

WALLET

● **Secure by default**

Clemo Wallet is the first secure crypto wallet built directly into the browser. No extensions, no extra steps. That means less vulnerability to faked versions of an app, phishing, and theft.

● **Superior performance**

Extensions slow down your device. Since Clemo Wallet is built directly into the browser, it takes no extra processes to run, and burns less CPU & memory on your device.

● **Buy, store, send, swap, & connect**

Store, manage, and grow your crypto portfolio. Find the best price match with built-in, multi-chain Clemo Swaps. And connect to Web3 DApps. All from one wallet.

● **The wallet super app**

NFT & multi-chain support. Natively connect other web3 DApps, without installing browser extensions.

● **Import other wallets**

MetaMask and self-custody wallets, or hardware wallets like Trezor & Ledger (no Ledger Live required).

Buy, store, sell tokens on Ethereum, EVM chains, Solana

Swap tokens on Ethereum, Polygon, Binance Smart Chain, Optimism, Celo, and Avalanche

Browser native (no extension

required) Open license

Ledger & Trezor support

No extra device processes or memory to

run Connect to DApps on Ethereum or

Solana.

What distinguishes Clemo Wallet from other wallets?

Security: The majority of cryptocurrency wallets are browser add-ons. These extensions come with built-in security vulnerabilities and are far more vulnerable to asset theft and account spoofing. Additionally, extensions need additional CPU resources, which affects your device's performance. In contrast, Clemo Wallet is native to the browser.
There is significantly less chance of account spoofing, phishing, and other scams while using Clemo Wallet. It is far more efficient and dependable overall, and uses less CPU power to run.

Multi-chain: Using the Clemo Wallet, users can transmit, receive, and acquire digital assets on several chains, including Solana, Ethereum, and chains that are compatible with the EVM. Additionally, you may link other hardware or self-custody wallets, view real-time market data, and manage your portfolio all in one location. Avalanche, Celo, Optimism, Polygon, Binance Smart Chain, Avalanche, and Binance may all be used to exchange assets and use Web3 DApps (coming soon for Solana holders).

To use Clemo Wallet, you must have the Clemo privacy browser.

The use of Clemo Wallet is totally free. However, gas fees are necessary for transactions (such sends or swaps), and swaps could also have an extra transaction fee. These fees will be comparable to or the same as those charged by other crypto wallets.

Open the Clemo Browser and click the icon in the toolbar to launch Clemo Wallet on your desktop. Open the menu of your mobile browser, then hit the symbol to launch Clemo Wallet.

Ethereum, EVM-compatible chains and L2, Filecoin, and Solana are supported by Clemo Wallet. Avalanche, Binance Smart Chain, Celo, Fantom, Optimism, and Polygon are among the cryptocurrencies that support Clemo Swaps.

WALLET

7- CLEMO SWAP

Using automated liquidity pools, token swaps on ClemoSwap are an easy way to exchange one BEP-20 token for another.

You will pay a 0.20% trading charge when you make a token swap (trade) on the exchange, which is divided as follows:

0.17% - Paid as a fee reward to liquidity providers and

returned to liquidity pools. Sent to the ClemoSwap Treasury:

0.03%.

Compared to most exchanges, trading on ClemoSwap is quite straightforward. Charts and technical language won't overwhelm you, and computations will be done automatically.

Setting up a trading system

You must have a wallet that is compatible with the BNB Smart

Chain in order to trade. The ClemoSwap exchange's trading

Go to the exchange page and click Unlock Wallet to unlock your BNB Smart Chain- compatible wallet (you can also Connect in the top right-hand corner). if your wallet isn't already linked to ClemoSwap.

Make sure you have some tokens to trade with, regardless of the one you select. A balance indicator is displayed above the token drop-down option.

Making the most of your cryptocurrency is made easier with

ClemoSwap in three ways: Buy, Sell, and Win.

Why pay more? The blockchain that powers ClemoSwap, BNB Smart Chain, has substantially cheaper transaction fees than Ethereum or Bitcoin. You win twice because the trading fees are lower than those charged by other leading decentralised exchanges.

SWAP

SWAP

● Decentralized

Trade directly from your wallet app. Unlike centralized exchanges like Binance or Coinbase, ClemoSwap doesn't hold your funds when you trade: you have

100% ownership of your own crypto.

● Transparent

We're built on open-source software

● Security best practices

The chefs use multisig for all contracts.

Our contracts' time-locks give you peace of mind.

A window with more details will appear. Check the details are correct.
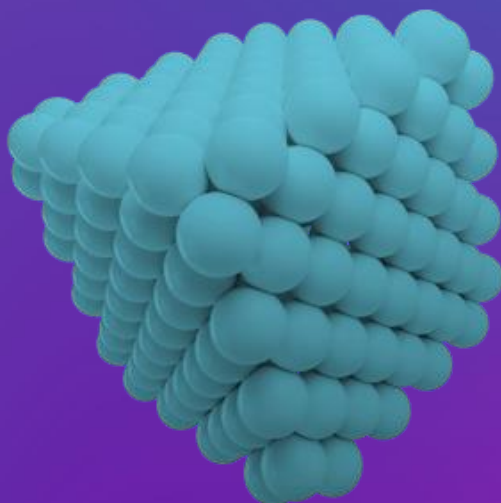

When you are ready, click the Confirm Swap button. Your wallet will ask you to confirm the action.

Done! You can click View on BscScan to see your transaction details on the explorer

How I can buy?

1. Install Metamask for your Browser

Go to metamask.io and install the browesr extension.Follow
the steps to set up your wallet.
Note! Remember to write down your seed phrase!

2. Set up Binance Smart Chain on Metamask

Add BSC Network to your wallet and paste
CLEMO Contract as a custom token.

Tip! Follow this guide:
https://academy.binance.com/en/articles/connecting-
metamask-to-binance-smart-chain

3. Send BNB to your wallet

Purchase or swap different tokens for BNB and send it to
your Metamask using the BEP20 Network.

4. Connect your wallet to PancakeSwap

Insert CLEMO Contract address and insert theamount
you want to swap and then click "Swap".
Note! Use at least 16% slippage.

0x
This is the only official contract!
